

EDPcable Company Profile

Custom cable and cable assembly solutions

Company Overview

Founded in 2012, EDPcable focuses on custom cable and cable assembly manufacturing for industrial, data, RF, medical, and special application projects. The company operates as a manufacturer website / independent site and works directly with equipment makers and project teams that need practical manufacturing cooperation.

Based in Dongguan, Guangdong, China, EDPcable works with customers that need responsive communication, low-MOQ support, prototype turnaround, and flexible production for ongoing cable projects.

What We Do

- Custom cable assemblies for project-based applications
- Wire harness and cable assembly development
- RF and coaxial cable solutions
- Data, signal, and control cable projects
- Connector termination, overmolding, and assembly support

Typical Product and Project Scope

- Custom cable and wire harness projects
- RF, coaxial, and signal cable assemblies
- Data and communication cable solutions
- Industrial and equipment interconnection cables
- Special application cable assemblies based on customer drawings or specifications

Service Model

- Low MOQ available, depending on cable type, connector, and material availability
- Typical sample lead time: 1-2 weeks after requirement confirmation
- Typical mass production lead time: 3-4 weeks after sample approval and order confirmation
- Technical and after-sales inquiries are typically acknowledged within 1 business day

Support Capabilities

- Requirement review and application discussion
- Material and connector selection support
- Prototype building and sample validation

- Small-batch and repeat production support
- Quality inspection and packaging coordination

Why Customers Work With Us

- Flexible support for custom projects
- Dedicated production team for cable assembly work
- Manufacturing capacity suited to custom orders and changing schedules
- Practical communication for drawings, samples, revisions, and delivery coordination
